Q2) What is the DNS	s service offered by AWS?
<ul><li>CloudFront</li></ul>	
Route 53	
Explanation:-Route 53	is the AWS DNS service. It got its name from the TCP and UDP port number, 53, that it relies on.
CloudFormation	
SQS	
Q3) Which is not a ty	pical service or tool associated with HA in AWS?
<ul><li>CloudWatch</li></ul>	
✓ CloudTrail	
	nese AWS tools and services, CloudTrail is the least directly tied to high availability in AWS. Remember that CloudTrail is a
•	psely monitor the API calls that permit clients to configure and interact with AWS.
Auto Scaling	soly monitor the 711 Found that permit change to comingular and interact with 71110.
ELB	
Q4) Which statemen	t regarding regions in AWS is not correct?
<ul> <li>Regions are connected</li> </ul>	ed with fast connections to other regions.
There are many region	ons in North America.
<ul> <li>Availability Zones exi</li> </ul>	st inside regions.
Regions in North Am-	erica rely on the presence of the other North American regions.
-	are independent and do not rely on the presence of other regions. This enhances high availability and fault tolerance.
Q5) What identity in	IAM is very similar to a user account but has no credentials associated with it?
<ul><li>Proxy user</li></ul>	
✓ Role	
_	powerful alternative to a specific user account. A role is often perfect for use in a scenario where one service must access
,	F 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1
another service.	
another service.  Principle	
Principle	
<ul><li>Principle</li><li>Group</li></ul>	ype offers the greatest possible cost savings?
<ul><li>Principle</li><li>Group</li></ul>	ype offers the greatest possible cost savings?
<ul><li>Principle</li><li>Group</li><li>Q6) What instance ty</li></ul>	ype offers the greatest possible cost savings?
<ul><li>Principle</li><li>Group</li><li>Q6) What instance ty</li><li>Dedicated</li></ul>	ype offers the greatest possible cost savings?
<ul> <li>Principle</li> <li>Group</li> </ul> Q6) What instance ty <ul> <li>Dedicated</li> <li>Reserved</li> <li>Spot</li> </ul>	
<ul> <li>Principle</li> <li>Group</li> </ul> Q6) What instance ty <ul> <li>Dedicated</li> <li>Reserved</li> <li>Spot</li> </ul>	ype offers the greatest possible cost savings?  In instances with spot pricing offers the largest potential savings.

- CloudFormation
- Auto Scaling
- IAM
- SEC2

**Explanation:**-While some AWS services can remain free after the expiration of a Free Tier account, EC2 instances do not.

## Q8) What service in AWS assists with your security efforts using roles, users, and groups?

- Glacier
- EC2
- ✓ IAM

**Explanation:**-Identity and Access Management (IAM) permits you to use users, roles, and groups in order to maintain security in the cloud.

S:

# Q9) What do you use to authenticate access to your EC2 instance?

- Telnet
- PPTP

✓ Key pairs     ✓ Ke
<b>Explanation:</b> -With AWS, you use key pairs for secure access to your EC2 instances.
Lambda
Q10) is the fully managed configuration management service in AWS.
<ul><li>CloudFormation</li></ul>
Explanation:-AWS OpsWorks is a configuration management service that provides managed instances of Chef and Puppet. Chef and Puppet are
automation platforms that allow you to use code to automate the configurations of your servers. OpsWorks lets you use Chef and Puppet to automate how servers are configured, deployed, and managed across your Amazon EC2 instances or on-premises compute environments.
CloudWatch
● CloudTrail
Q11) Which is not considered a benefit of orchestration?
Reduction of friction between different teams
Improvement of delivery times
Elimination of the need for experimentation
<b>Explanation:</b> -Orchestration does not help eliminate the need for experimentation. In fact, it increases the ability to freely experiment.
Reduction of overall IT costs
Q12) Why is automation so easily accommodated in AWS?
Physical systems host the EC2 instances you work with daily.
Multiple regions facilitate code deployment.  Claud Trail provides systematics to make for your.
<ul> <li>CloudTrail provides automation templates for you.</li> <li>All actions can be implemented through API calls.</li> </ul>
Explanation:-The use of APIs for everything in AWS provides ease of automation, among other benefits.
Q13) Amazon seeks out attestations from what types of organizations? (Choose two.)
<ul> <li>Subsidiary</li> </ul>
▼ Third party     ■ T
Explanation:-Third-party and independent organizations provide the attestations for AWS.
<b>Explanation:</b> -Third-party and independent organizations provide the attestations for AWS.
Dependent
Q14) permits you to use a private connection from your facility to AWS.
VPC endpoint
● VPC peering
Explanation:-AWS Direct Connect is a cloud service solution that makes it easy to establish a dedicated network connection from your premises to
AWS. Using AWS Direct Connect, you can establish private connectivity between AWS and your data center, office, or colocation environment, which
in many cases can reduce your network costs, increase bandwidth throughput, and provide a more consistent network experience than Internet- based connections.
ClassicLink
Q15) What component allows you to connect privately from your Virtual Private Cloud (VPC) to services you need?
Direct Connect
● VPN
CloudFront
✓ VPC endpoint
Explanation:-A VPC endpoint enables you to privately connect your VPC to supported AWS services and VPC endpoint services powered by
PrivateLink without requiring an Internet gateway, a NAT device, a VPN connection, or an AWS Direct Connect connection. Instances in your VPC do
not require public IP addresses to communicate with resources in the service. Traffic between your VPC and the other service does not leave the Amazon network.
Q16) Which cloud service model does Gmail represent?
PaaS
● laaS
<b>⊘</b> SaaS
Explanation:-Gmail is an excellent example of Software as a Service.
• FaaS
Q17) IAM can permit access to accounts that have already been authenticated in another domain or application. What is this called?
Proxy

Explanation:-Federation is becoming more and more popular. You might access an AWS resource after being successfully authenticated by a social

Federation

Role sharing	
Q18) Which of the following is not something Amazon typically provides to AWS customers in the area of comp	liance?
Security features	
Compliance playbooks	
Mapping documents	
Physical host security playbooks	
xplanation:-Compliance resources provided to customers include mapping documents, compliance playbooks, and security fe	eatures.
Q19) Which is not a major category of the AWS discussion forums?	
AWS Startups	
Amazon Web Services	
German Forums	
AWS Security Alerts	
xplanation:-There is no forum for AWS Security Alerts. There are, however, many different language forums and many forums elated topics.	s for development-
Q20) In a high security environment, what should you do with privileged user accounts?	
Use MFA with these accounts	
xplanation:-You should always use Multifactor Authentication, if possible, especially with privileged users.	
Share the access keys with other accounts that require access	
Create roles that mimic the accounts	
Store credentials in an S3 bucket	
TOTO OF CACHILLIA III AIT OO DAONEL

Container VPC Instance type	rning, massively minutes. You can azon S3. You can is.

### Q23) What would you use if you have multiple VPCs in AWS and need to communicate between them?

Direct Connect

media domain, for example.

✓ VPC peering

**Explanation:**-A VPC peering connection is a networking connection between two VPCs that enables you to route traffic between them using private IPv4 addresses or IPv6 addresses. Instances in either VPC can communicate with each other as if they were within the same network. You can create a VPC peering connection between your own VPCs or with a VPC in another AWS account. The VPCs can be in different regions (also known as an inter-region VPC peering connection).

- Gateway endpoint
- ClassicLink

#### Q24) What learning path is recommended for those in compliance roles in your AWS architecture?

- Architect learning path
- Auditor learning path

**Explanation:**-The AWS Auditor learning path is designed for those in auditor, compliance, and legal roles who want to learn how their internal operations can demonstrate compliance using the AWS platform. It helps build the skills necessary to understand how to audit solutions on the AWS cloud.

- Code learning path
- SysOps learning path

#### Q25) Client responsibilities vary in the Shared Responsibility model based on what major factor?

- How much money the customer is willing to spend on support
- The amount of customer data intended for cloud storage

Explanation:-AWS customers face varying security responsibilities in AWS, based partly upon which services they choose.
Explanation 7.110 designifies race varying security responsibilities in Avvo, based partity upon while services they choose.
The number of AWS employees in the region used by the customer
Q26) Availability Zones (AZs) are located in each region in the AWS global infrastructure.
<ul><li>One</li></ul>
• Two
At least two
Explanation:-A regions features at least two AZs, primarily for high availability and fault tolerance.
Three
Q27) Which of the following is associated with an Elastic Network Interface for providing security?
<ul><li>Subnet</li></ul>
• NACL
Security group
Explanation:-Security groups can help control security of EC2 instances. These groups consist of rules for access. Security groups are associated
with ENIs.
● IGW
Q28) Which of the following is true regarding HA in an on-premises data center?
It is never truly achievable.
It is typically implemented at a lower cost than in the cloud.
It is typically implemented throughout the entire data center.
It is typically reserved for only the most mission-critical systems or data.
Explanation:-Often, due to budget concerns, you cannot provide true HA to all systems in an on-premises data center. You can only afford to
provide it for the most mission-critical systems.
Q29) Who can act as a dedicated voice for you within AWS and serve as your technical point of contact and advocate?
Primary solution architect
TAM
<b>Explanation:</b> -Consultative partnerships support specific use cases and applications and include design reviews and architectural guidance. The
support team of an Enterprise-level customer includes a designated technical account manager and access to an AWS solutions architect.
Cloud practitioner
<ul><li>Concierge</li></ul>
Q30) uses an Edge Location in an AWS region.
● S3
RDS
₩ NDO
CloudFormation
CloudFormation CloudFront
<b>⊘</b> CloudFront
CloudFront Explanation:-CloudFront uses Edge Locations for low-latency, efficient delivery of cached content.

Q36) Which is not an example of a service	that remains free after the Free Tier expiration?
<ul><li>CloudWatch</li></ul>	
<ul><li>Glacier</li></ul>	
✓ EC2	
Explanation:-While SNS, Glacier, and CloudWatc SNS	h can all remain free after the expiration of a Free Tier account, EC2 does not.
Q37) Which of the following is an AWS NoS	QL database solution that is often used with the IoT?
<ul><li>Snowball</li></ul>	
✓ DynamoDB	
Explanation:-DynamoDB is the AWS NoSQL option	on for high-performance database work. DynamoDB is often used with large online gaming and
loT solutions.	
<ul><li>Aurora</li></ul>	
<ul> <li>Glacier</li> <li>Q38) Amazon is interested in offering you that accommodates this?</li> <li>Fault tolerance</li> </ul>	high levels of confidentiality with your data in AWS. What is a key technology area
Q38) Amazon is interested in offering you that accommodates this?  Fault tolerance Hashing Encryption	high levels of confidentiality with your data in AWS. What is a key technology area
Q38) Amazon is interested in offering you that accommodates this?  Fault tolerance Hashing Encryption Explanation:-Encryption ensures that AWS data of	cannot be understood by someone who might acquire the data.
Q38) Amazon is interested in offering you that accommodates this?  Fault tolerance Hashing Encryption Explanation:-Encryption ensures that AWS data of Authentication	cannot be understood by someone who might acquire the data.
Q38) Amazon is interested in offering you that accommodates this?  Fault tolerance Hashing Encryption Explanation:-Encryption ensures that AWS data of Authentication  Q39) Which is not a fundamental cost in AW	cannot be understood by someone who might acquire the data.
Q38) Amazon is interested in offering you that accommodates this?  Fault tolerance Hashing Encryption Explanation:-Encryption ensures that AWS data of Authentication  Q39) Which is not a fundamental cost in AW Data transfer out	cannot be understood by someone who might acquire the data.
Q38) Amazon is interested in offering you that accommodates this?  Fault tolerance Hashing Encryption Explanation:-Encryption ensures that AWS data of Authentication  Q39) Which is not a fundamental cost in AW Data transfer out Storage Data transfer in	cannot be understood by someone who might acquire the data.
Q38) Amazon is interested in offering you that accommodates this?  Fault tolerance Hashing Encryption Explanation:-Encryption ensures that AWS data of Authentication  Q39) Which is not a fundamental cost in AW Data transfer out Storage Data transfer in	cannot be understood by someone who might acquire the data.
Q38) Amazon is interested in offering you that accommodates this?  Fault tolerance Hashing Encryption Explanation:-Encryption ensures that AWS data of Authentication  Q39) Which is not a fundamental cost in AW Data transfer out Storage Data transfer in Explanation:-Compute, storage, and data transfer	cannot be understood by someone who might acquire the data.  1/S?  Tout are all fundamental costs in AWS.
Q38) Amazon is interested in offering you that accommodates this?  Fault tolerance Hashing Encryption Explanation:-Encryption ensures that AWS data of Authentication  Q39) Which is not a fundamental cost in AW Data transfer out Storage Data transfer in Explanation:-Compute, storage, and data transfer Compute  Q40) Which statement regarding the AWS data	cannot be understood by someone who might acquire the data.
Q38) Amazon is interested in offering you that accommodates this?  Fault tolerance Hashing Encryption Explanation:-Encryption ensures that AWS data of Authentication  Q39) Which is not a fundamental cost in AW Data transfer out Storage Data transfer in Explanation:-Compute, storage, and data transfer Compute  Q40) Which statement regarding the AWS description.	cannot be understood by someone who might acquire the data.  78?  Tout are all fundamental costs in AWS.
Q38) Amazon is interested in offering you that accommodates this?  Fault tolerance Hashing Encryption Explanation:-Encryption ensures that AWS data of Authentication  Q39) Which is not a fundamental cost in AW Data transfer out Storage Data transfer in Explanation:-Compute, storage, and data transfer Compute  Q40) Which statement regarding the AWS description The documentation is accessed online. The documentation consists of user guides and	cannot be understood by someone who might acquire the data.  IS?  Tout are all fundamental costs in AWS.  Cocumentation is false?  It references broken down by topic.
Q38) Amazon is interested in offering you that accommodates this?  Fault tolerance Hashing Encryption Explanation:-Encryption ensures that AWS data of Authentication  Q39) Which is not a fundamental cost in AW Data transfer out Storage Data transfer in Explanation:-Compute, storage, and data transfer Compute  Q40) Which statement regarding the AWS description The documentation is accessed online. The documentation consists of user guides and You cannot access the documentation of AWS	cannot be understood by someone who might acquire the data.  IS?  Tout are all fundamental costs in AWS.  Cocumentation is false?  It references broken down by topic.  without at least a Free Tier account.
Q38) Amazon is interested in offering you that accommodates this?  Fault tolerance Hashing Encryption Explanation:-Encryption ensures that AWS data of Authentication  Q39) Which is not a fundamental cost in AW Data transfer out Storage Data transfer in Explanation:-Compute, storage, and data transfer Compute  Q40) Which statement regarding the AWS description The documentation is accessed online. The documentation consists of user guides and You cannot access the documentation of AWS	cannot be understood by someone who might acquire the data.  18?  Tout are all fundamental costs in AWS.  Cocumentation is false?  It references broken down by topic.  without at least a Free Tier account.  to access the AWS documentation.
Q38) Amazon is interested in offering you that accommodates this?  Fault tolerance Hashing Encryption Explanation:-Encryption ensures that AWS data of Authentication  Q39) Which is not a fundamental cost in AW Data transfer out Storage Data transfer in Explanation:-Compute, storage, and data transfer Compute  Q40) Which statement regarding the AWS description The documentation is accessed online. The documentation consists of user guides and You cannot access the documentation of AWS Explanation:-You do not have to have an account	cannot be understood by someone who might acquire the data.  IS?  Out are all fundamental costs in AWS.  Occumentation is false?  If references broken down by topic. without at least a Free Tier account. to access the AWS documentation. ed to assist your usage.
Q38) Amazon is interested in offering you that accommodates this?  Fault tolerance Hashing Encryption Explanation:-Encryption ensures that AWS data of Authentication  Q39) Which is not a fundamental cost in AW Data transfer out Storage Data transfer in Explanation:-Compute, storage, and data transfer Compute  Q40) Which statement regarding the AWS description The documentation is accessed online. The documentation consists of user guides and You cannot access the documentation of AWS Explanation:-You do not have to have an account The AWS documentation is carefully categorized  Q41) Which of the following are cost calculated AWS Cost Comparison Calculator	cannot be understood by someone who might acquire the data.  IS?  Out are all fundamental costs in AWS.  Occumentation is false?  If references broken down by topic. without at least a Free Tier account. to access the AWS documentation. ed to assist your usage.
Q38) Amazon is interested in offering you that accommodates this?  Fault tolerance Hashing Encryption Explanation:-Encryption ensures that AWS data of Authentication  Q39) Which is not a fundamental cost in AW Data transfer out Storage Data transfer in Explanation:-Compute, storage, and data transfer Compute  Q40) Which statement regarding the AWS description The documentation is accessed online. The documentation consists of user guides and You cannot access the documentation of AWS Explanation:-You do not have to have an account The AWS documentation is carefully categorized  Q41) Which of the following are cost calculated AWS Cost Comparison Calculator AWS Simple Monthly Calculator	cannot be understood by someone who might acquire the data.  IS?  Out are all fundamental costs in AWS.  Ocumentation is false?  If references broken down by topic, without at least a Free Tier account, to access the AWS documentation, and to assist your usage.  Sators available in AWS? (Choose two.)
Q38) Amazon is interested in offering you that accommodates this?  Fault tolerance Hashing Encryption Explanation:-Encryption ensures that AWS data of Authentication  Q39) Which is not a fundamental cost in AW Data transfer out Storage Data transfer in Explanation:-Compute, storage, and data transfer Compute  Q40) Which statement regarding the AWS described on the documentation is accessed online. The documentation consists of user guides and You cannot access the documentation of AWS Explanation:-You do not have to have an account The AWS documentation is carefully categorized  Q41) Which of the following are cost calculated AWS Cost Comparison Calculator AWS Simple Monthly Calculator Explanation:-Two very popular cost calculators for	cannot be understood by someone who might acquire the data.  IS?  Out are all fundamental costs in AWS.  Occumentation is false?  If references broken down by topic. without at least a Free Tier account. to access the AWS documentation. ed to assist your usage.
Q38) Amazon is interested in offering you that accommodates this?  Fault tolerance Hashing Encryption Explanation:-Encryption ensures that AWS data of Authentication  Q39) Which is not a fundamental cost in AW Data transfer out Storage Data transfer in Explanation:-Compute, storage, and data transfer Compute  Q40) Which statement regarding the AWS described on the documentation is accessed online. The documentation consists of user guides and You cannot access the documentation of AWS Explanation:-You do not have to have an account The AWS documentation is carefully categorized  Q41) Which of the following are cost calculated AWS Cost Comparison Calculator AWS Simple Monthly Calculator Explanation:-Two very popular cost calculators for AWS Fee Estimator	cannot be understood by someone who might acquire the data.  IS?  Out are all fundamental costs in AWS.  Ocumentation is false?  If references broken down by topic, without at least a Free Tier account, to access the AWS documentation, and to assist your usage.  Sators available in AWS? (Choose two.)
Q38) Amazon is interested in offering you that accommodates this?  Fault tolerance Hashing Encryption Explanation:-Encryption ensures that AWS data of Authentication  Q39) Which is not a fundamental cost in AW Data transfer out Storage Data transfer in Explanation:-Compute, storage, and data transfer Compute  Q40) Which statement regarding the AWS described on the documentation is accessed online. The documentation consists of user guides and You cannot access the documentation of AWS Explanation:-You do not have to have an account The AWS documentation is carefully categorized  Q41) Which of the following are cost calculated AWS Cost Comparison Calculator AWS Simple Monthly Calculator Explanation:-Two very popular cost calculators for AWS Fee Estimator TCO Calculator	cannot be understood by someone who might acquire the data.  IS?  Out are all fundamental costs in AWS.  Ocumentation is false?  If references broken down by topic, without at least a Free Tier account, to access the AWS documentation, and to assist your usage.  Sators available in AWS? (Choose two.)

monitor this?

AWS customer
Explanation:-In the Shared Responsibility model, AWS and the customer of AWS share the security responsibilities.

**Explanation:-**In the Shared Responsibility model, AWS and the customer of AWS share the security responsibilities.

AWS

AWS partner

Community cloud vendor
Q43) Where should firewalling be accomplished in a web hosting design in AWS?
For all access layer functions
At the core
At all design layers
explanation:-Thanks to the robust capabilities of firewalling in AWS web hosting designs, this security measure can be implemented at all layers of
ne design.
At the perimeter
Q44) What minimal level of support gives you access to a TAM?
Developer
Basic
Enterprise
Explanation:-The Enterprise level of support provides TAM access.
Business
Q45) Which of the following is not considered a benefit of automation?
Reduction in operating costs
Simpler and faster code deployment
Reduction in the potential for errors
Reduction in required security measures
explanation:-Automation can benefit security greatly, but it does not necessarily reduce the number of security measures you must implement.
Q46) Which of the following is not an example of a client responsibility in the AWS Shared Responsibility model?
Customer data
Guest operating system
Virtualization software on the host
Explanation:-Amazon takes care of securing the virtualization software they use in their data centers on their host hardware systems.
Data integrity authentication
Q47) Which of the following is not one of the pillars of the Well-Architected Framework from Amazon?
Operational excellence
Speed Speed
Explanation:-Security, cost optimization, and operational excellence are all pillars of the Well-Architected Framework. Speed is a tremendous
dvantage when discussing cloud technology (for example, speed in deployment, speed in innovation), but it is not one of the pillars of the Well-
architected Framework.
Cost optimization
Security
Q48) Ensuring that you have traceability is critical in AWS. Traceability typically falls under what AWS design pillar?
Performance efficiency
Security
Explanation:-A huge advantage with AWS is the fact that you have traceability of API calls throughout the architecture. This means you can conduct
ntense audits and analyses of activities, including those that might be unauthorized. The traceability characteristic falls under the security pillar.
Cost optimization
Operational excellence
Q49) Which of the following is not a type of EC2 purchase plan?
Spot Spot
Reserved
Virtual only
Explanation:-EC2 instances can be purchased in the default on-demand manner, they can be reserved, or you can bid on capacity with spot
nstances.
● On demand
Q50) acts as your own cloud expert in AWS, providing recommendations for greater security based on your existing configurations.
Cognito
Artifact Service Control of the Cont
EC2
Trusted Advisor
Explanation:-AWS Trusted Advisor inspects the AWS environment and makes recommendations for saving money, improving system performance and reliability, and closing security gaps. Since 2013, AWS customers have viewed more than 1.7 million best-practice recommendations in AWS

Trusted Advisor in the categories of cost optimization, performance improvement, security, and fault tolerance, and they have realized over \$300

million in estimated cost reductions.

# Q51) What is the result of orchestration? A consolidated process or workflow Explanation:-Orchestration is often the result of sophisticated workflows and processes of many automated tasks and processes. An environment that can be replicated easily on any public cloud platform Alignment of all required tasks in an independent execution environment An architecture guaranteed to be free of errors Q52) What is a central resource for compliance-related AWS information? ProtectGuard Lambda Artifact Explanation:-AWS Artifact is your go-to central resource for compliance-related information that matters to you. It provides on-demand access to AWS's security and compliance reports and select online agreements. Reports available in AWS Artifact include our Service Organization Control (SOC) reports, Payment Card Industry (PCI) reports, and certifications from accreditation bodies across geographies and compliance verticals that validate the implementation and operating effectiveness of AWS security controls. CodeLearn Q53) How many discrete data centers are located in an AZ in the AWS global infrastructure? At least four At least two At least three At least one Explanation:-There is at least one discrete data center in an Availability Zone (AZ). Some AZs have more than one. Q54) CloudWatch falls into which category of management options? Monitoring and logging Explanation:-CloudWatch and CloudTrail are monitoring and logging tools. Managed services for configuration Provisioning Operations management Q55) How long is the Free Tier period, by default? 6 months 1 year Explanation:-The Free Tier account has a default duration of 1 year. 3 months 2 years Q56) Which is not a common category of IT security controls in the AWS Shared Responsibility model? Deferred Explanation:-Deferred is not a category in the Shared Responsibility model. Shared Customer specific Inherited Q57) Where can you find third-party products for use with AWS? IEEE standards docs Wikipedia.org NIST standards AWS Marketplace Explanation:-The AWS Marketplace allows you to purchase a wide range of products for use with AWS, including operating systems, security products, and networking technologies. Q58) What two support plans offer response times of 1 hour or less? (Choose two.) Basic Business Explanation:-The Enterprise and Business plans offer response times of 1 hour or less. Explanation:-The Enterprise and Business plans offer response times of 1 hour or less. Developer

Q59) Why does AWS guarantee your exchange rate with AWS Billing and Cost Management?

- To optimize your costs for resources
- To save you costs
- To minimize the number of transactions in the system

To ensure that any refund uses the same exchange rate as the original transaction Explanation:-If a refund occurs, it needs to use the same exchange rate as the original transaction.		
Q60) Which of the following is not an example of an Amazon responsibility in the AWS Shared Responsibility model?		
Edge locations		
Cloud software		
Physical security of the data center		
Explanation:-Identity and Access Management (IAM) policies are an AWS customer responsibility.		
Q61) What service in AWS allows core checks to be performed by any customer, regardless of support plan level?		
● CloudTrail		
CloudFormation		
CloudFront		
▼ Trusted Advisor		
Explanation:-The Trusted Advisor service, which aids in management and operation of AWS, is available with all support plans.		
Q62) How does Amazon design each AZ in the AWS global infrastructure?		
As being dependent on at least one other AZ		
To exist outside a region		
🕏 As an independent failure domain		
Explanation:-Each Availability Zone (AZ) is designed to be an independent failure domain.		
To be located in the largest city in a region		
Q63) What is required in order to post questions to the official discussion forums of AWS?		
The Enterprise support plan		
An AWS account		
Explanation:-Forum access requires an AWS account—even a Free Tier account.		
No special requirement exists		
The Desktop support plan		
Q64) What component does the Budgets tool in AWS use for visualization?		
Excel		
● Tableau		
AWS GraphSage		
Cost Explorer		
Explanation:-Cost Explorer can help you in budgeting and planning for your AWS expenditures.
